Summary –

Computer Science undergraduate with strong interest in Artificial Intelligence, Machine Learning, and Computer Vision. Experienced in building real-time AI systems, voice-based applications, and data-driven solutions using Python and modern web technologies. Passionate about solving real-world problems through technology.

Technical Skills --

- **Languages** | C, C++, Python, JavaScript.
- **Web Development** | HTML, CSS, JavaScript, React.js, Express.js
- **Database** | MySQL, MongoDB.
- **Machine Learning & Data Analytics** | Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn, Data Cleaning, Feature Engineering, Model Training & Evaluation.
- **AI** | Speech Recognition, Rule-Based NLP, Machine Learning (Linear Regression), Computer Vision, Demand Prediction.
- **Tools** | VS Code, Git, GitHub, GoogleColab.

Major Projects –

- **OPJU Event Website** | Feb 2025 – Mar 2025 | Next.js, Tailwind CSS – Built and deployed a responsive event website for OPJU's Technorollx fest with a modern, dynamic UI. [Github](#)
- **Smart Railway AI Surveillance System** | August 2025 | Developed an AI-based passenger verification system with real-time alert generation. [Github](#)
- **Jarvish – AI Khata Book** | September 2025 | Built a smart voice-enabled digital ledger system with AI-based customer recognition, automated due tracking, and offline-first transaction management for small businesses. [Github](#)
- **AI MicroExpression Analyzer** | NOV 2025–DEC 2025 | AI-based system to analyze facial micro-expressions for real-time emotion and stress detection. [Github](#)
- **AI Doctor** | Jan 2026 | AI-based health assistance system that analyzes user symptoms using ML/NLP logic to provide preliminary medical suggestions. [Github](#)

Minor Projects –

- **E-COMMERCE WEBSITE** | SEP 2024 – OCT 2024 | A simple E-Commerce-only website, with HTML, CSS, JS. [Live site](#)
- **SafeDrive – AI Drowsiness Detection** | Dec 2025 | AI-based driver drowsiness detection system using computer vision to monitor eye and facial features in real time and trigger safety alerts. [Github](#)
- **AirDraw** | Oct 2025 | Computer vision-based AirDraw system that allows users to draw on screen using hand gestures captured through a webcam. [Github](#)

Education –

- **Graduation** | **O.P. Jindal University, Raigarh, Chhattisgarh** | Bachelor of Technology in Computer Science and Engineering | Currently in 6th Sem | 2023–2027
- **Higher Secondary** | **Ms College Mairwa, Siwan, Bihar** | Completed in 2023
- **Matriculation** | **Uhs Mathiya, Siwan, Bihar** | Completed in 2021

Certification –

- ✓ **Smart India Hackathon** | *Intercollege Hackathon – Level 2* | 24 Nov 2023 -- Participated in Smart India Hackathon, University Finalist.
- ✓ **Certificate of Course in Data-Analytics by CISCO** | 21 November 2023 | An Entry Level to advance Data Analytics Course Conducted Offline in the University.
- ✓ **National Innovation Fest** | Served as the Coordinator for the National Innovation Foundation (NIF), facilitating and promoting grassroots innovations and student-led projects.
- ✓ **SOAR – AI to be Aware** | It is an NCVET-recognised Skill India certification by HCL, focused on AI awareness and industry-oriented skills.

Experience / Internship –

- **AI/ML Internship at amibba systems Pvt. Ltd.** | Dec 2025 – Mar 2026 | Worked on AI/ML projects involving data preprocessing, model training, and real-world deployment.
